EDUCATION

UNIVERSITY OF SOUTH CAROLINA

Bachelor of Science in Computer Science

Cumulative GPA: 3.3 | Dean's List

William Edward Dent Jr. Scholarship Recipient

Columbia, SC

May 2026

WORK EXPERIENCE

The Ritedose Corporation

IT Intern

Columbia, SC

May 2025 – Aug 2025

- Configured and deployed Windows 11 workstations and VoIP phones for new hires.
- Reimaged legacy laptops using BIOS settings and bootable USB drives to restore performance.
- Authored troubleshooting documentation to standardize responses to common IT issues.
- Analyzed network configurations and connectivity using PuTTY and command-line tools.
- Created a facility-wide network asset map of Cisco 2960 switches to aid future upgrades.
- Assisted in identifying and mitigating phishing attempts using cybersecurity best practices.

PROJECTS

Retail Revenue Dashboard | SQL, Python, pandas, Power BI, SQLite

Ongoing

- Built a Power BI dashboard analyzing 500,000+ retail transactions across revenue, retention, products, and country sales.
- Cleaned data with Python/pandas and wrote SQL queries to validate KPIs including revenue, average order value, and repeat customer rate.

Global Internet Adoption Dashboard

April 2026 – May 2026

- Built an interactive dashboard using R Shiny, ggplot2, Plotly, and Excel to analyze global internet adoption and social connection trends across countries, regions, income groups, and years.
- Cleaned, transformed, and organized multi-source datasets to improve accuracy, consistency, and usability for analysis.
- Created filters, summary cards, visualizations, and key findings to communicate trends and insights to non-technical users.
- Presented insights responsibly by explaining correlations and avoiding unsupported causal claims.

Kill the Hero – Capstone Project, Web-Based Trading Card Game (TCG)

Aug 2025 – May 2026

- Developed full-stack gameplay features using React, Golang, PostgreSQL, and REST APIs.
- Built real-time multiplayer functionality with WebSockets and AI-controlled bots.
- Used Docker and Docker Compose for consistent local development and testing.

Language Learning App – Group Project, Java & JavaFX

Aug 2024 – Dec 2024

- Built a gamified board-style app to help students learn Spanish through interactive lessons.
- Designed interactive learning games: flashcards, matching, multiple choice, and fill-in-the-blank.
- Integrated text-to-speech narration for auditory learning.
- Implemented JSON-based data persistence for user progress and application data storage.

ACTIVITIES

Society of Hispanic Professional Engineers (SHPE)

Jan 2025 – May 2026

- Attended meetings and events promoting diversity in STEM.

TECHNICAL SKILLS

Java, Python, HTML, CSS, JavaScript, C++, Assembly, MATLAB, PuTTY, Pandas, JSON, RStudio, Windows, Linux, SQL, Tableau, Golang, React, Git, Github, Excel, ggplot2, Plotly, Power BI, R Shiny, Data cleaning, PostgreSQL, Data visualization
